

H. Larry Niemoeller

As the Information Technology Officer for the Office for Protection from Research Risks (OPRR), Larry Niemoeller serves as the professional authority for OPRR on matters related to computers and information technology. He directs the development and maintenance of OPRR tracking systems and coordinates educational and informational materials appearing on the OPRR World Wide Web site.

Larry graduated from the University of Southern California in 1979 with a Master of Science of Information Systems Management (MSSM) degree. He earned his Master of Business Administration (MBA) degree from Jacksonville State University in 1977. He is certified as a Computer Data Processor (CDP) and Computer Systems Professional (CSP) by the Institute for Certification of Computer Professionals (ICCP).

Larry retired from the U.S. Army Medical Service Corps in 1991 as a Biomedical Information Systems Officer. He served as an Information Management Officer (IMO) for several Army medical treatment facilities (stateside and abroad) and with the Headquarters, U.S. Army Medical Research and Development Command. His final assignment was as the Chief of the Information Management Division for Kimbrough Army Community Hospital, Fort Meade, Maryland. Remaining in the Washington, D.C. area, he joined the Food and Drug Administration, where he served as a computer specialist for seven years. He transferred to OPRR in March 1999.
